

1 Place the pad on wound and wrap the bandage around the body part or limb.

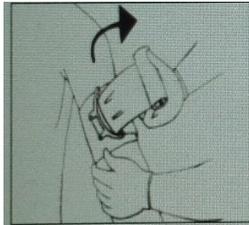

2 Insert the bandage into the pressure bar.

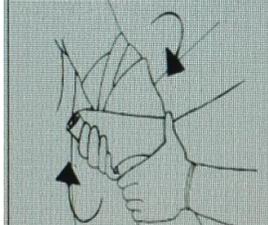

3 Tighten the bandage.

4 Pull back hard – forcing the pressure bar onto the pad.

5 Wrap the bandage tightly over the pressure bar and wrap over all edges of the pad.

6 Secure hooking ends of the closure bar into the bandage.

7. Remove the secured hooking ends of the closure bar to remove the bandage.
